Assure Medispa: the specialists

Meet our staff - Kerry

Kerry is a Registered Nurse with over 15 years experience in injecting making her one of the very first and most experienced injectors in Australia!

Kerry trained at Royal Adelaide Hospital - when Kerry did her training, all nurses were hospital trained and it was years before nursing was introduced as a university course. Her interest in plastic and cosmetic surgery was sparked by working with Plastic Surgeons - and now she is not only an extremely experienced injector, but also a trainer in injecting.

Kerry is a mother of four and grandmother of two - and absolutely loves to travel. She'll always be pleased to tell you about her next trip!

Kerry works sessionally, so isn't here every day. Please call us on 9380 0380 to make your appointment to see her. Or email specialists@assuremedispa.com.au.

Just what can you do with injectables?

Most of us know you can stop your forehead wrinkles with wrinkle relaxant, and you can plump up your lips with filler but there are in fact many more things we can do with injectables.

You can smooth out a jawline - as we age, we can get nasty little jowly bits. A little bit of dermal filler can smooth these out and give you back your smooth, non-jowly jawline.

You can minimise bags under the eyes - there are a couple of little tricks that can be done with dermal filler to really minimise dark circles and eye bags. If you feel that no matter how much sleep you get, or how carefully you apply makeup, you still look tired and worn down, then perhaps it's worth popping in for a chat to see what we can do to help.

You can treat excessive sweating - many a beautiful bride has had her special day marred by armpit wetness - and, of course, i it's worse in summer. A combination of a magnificent summer in Perth, a heavy wedding dress and bridal jitters is enough to really ruin things for some brides. If you're prone to being "sweaty" you can have your armpits treated with wrinkle relaxant (sounds weird I know but it works really well) and be completely confident in your appearance. For the entire day! This treatment costs $1200 and lasts about 9 months.

You can minimise crows feet - even though it's great to see someone's smile extend all the way to their eyes, it's still best to see open eyes; eyes that disappear into your crows feet every time you smile is a look no-one wants. A wee bit of wrinkle relaxant into the crows feet and - presto - you can extend your smile to your wide-open eyes!

You can get rid of smoker's lines - even if you've never been a smoker, sometimes smokers lines just spring up from nowhere. A unit of filler stragetically injected into and around the lip margin can make a world of difference. And then, as a real bonus, your lipstick won't bleed away from your lips either. And while your smoker's lines are being treated, the little downturn at the edge of your lips can be fixed too!

There are lots of ways injectables can help you regain or retain the look you want - without looking plastic. Remember, the first appointment is always free - so if you or anyone you know wants to pop in for a chat with our Registered Nurse, please just give us a ring on 9380 0380 or email specialists@assuremedispa.com.au .
