

The Western Australian Plastic Surgery Centre launched its dedicated medispa late last year. Assure Medispa is a purpose-built facility offering a range of services including chemical peels, wrinkle relaxers, IPL, microdermabrasion and specialist pre and post-operative care programs. During the initial consultation at Assure, a skin analysis is conducted using a skin imaging system called Beau Visage. Based on the results, a customised "Medi-Plan" is devised, recommending a regime of treatments and products matching the client's individual needs.

The medical-grade procedures and treatments are supervised by plastic surgeons so clients feel confident in the aesthetic therapy process. The medispa is located at Subiaco's St John of God Medical Clinic with private access and parking available on request. *For more information visit assuremedispa.com.au or contact (08) 9380 0380.*
